Victorian Bell- Garden Cloches

(Organic Friendly Products)

Beat The Seasons by up to 3 Months !

Cloche is a French word meaning Bell. These cloches were used by Gardeners in the Victorian era with excellent results and have become fashionable again because of their space saving features in the smaller modern gardens and raised gardens today. Victorian Bells remain one of our most popular products not only for their practical means of Organic Friendly free plant protection but are a highly decorative addition to your garden with glass appearance.

The perfect addition to a garden or raised garden when conventional cloche arches are not practical. They are light weight easy to move ideal for covering individual plants, providing protection in their own micro climate free from harsh weather, frosts and pests.

This can give 6 to 8 weeks harvest or flowering advantage. Made from tough UV Stabilized, clear plastic the curved surface of the bell minimize sun reflection and maximizes penetrations of light by keeping the Sun at right angles to the bell surface at all times of the day. An adjustable top vent is used to control heat and humidity.

- Ideal for early Start and warming soil prior to sowing vegetables, herbs, bedding plants
- Protection against harsh weather and frosts
- For establishing early seedlings
- Protects against slugs, insects, birds, animals
- Promotes Stable and Healthy New Growth
- Drying Bulbs

Vent in top of bell
